# *The Art of China*

## **More than just a gift, A Work of Art**

From the earliest recorded history of China, great emphasis has been placed on aesthetics, beauty and art. So it is with the range of product bought to you by The Eastern Red Trading Company. Each product group, included our hand art range of fans, has been chosen for its quality, hand crafted and traditional character.

We are proud to bring you the exquisite Qin Dynasty, Replica Black Pottery. The pieces in our range have been selected for their beauty as much as the cultural significance. Not just a mass-produced gift item, each piece is a limited production, hand crafted, yet affordable, piece of art. The art nature of the pieces means they will truly increase in value.

The exquisite designs hand painted on the inside of each item in our glass bottle and vase range, are priceless in their beauty. Specially trained artists, painstakingly draft the reproduction image in multiple layers on the inside of each bottle. The end result is a range of product that makes an ideal collection in any display cabinet.

Our framed silk embroideries are some of the finest tapestries produced in China, each a hand-embroidered reproduction of the original. Individually or in a set, they make an excellent choice of decoration in the home or office. The designs selected for our range are those most closely identified with China.

The beauty and value of Yixing teapots is renowned the world over. Today, they are as lovingly crafted in the same timeless manner as they have since the discovery of the Zisha clay and the establishment of Yixing as the centre of excellent teapot production. Timeless and collectable, giving a Yixing teapot is giving an asset, not just a gift.
